Technical Specifications and Trial Directives of Leaf blower

SN.	Technical Specifications	Trial Directives
1.	High air flow and volume - not less than 350 CFM (cubic feet per minute)	BOO to physically check and verify the parameter through OEM certificate.
2.	Light weight and portable, (not more than 12Kg)	BOO to physically check and verify the weight.
3.	Should be built to withstand heavy use and be able to withstand exposure to dust, dirt and other debris.	BOO to check and verify the parameter through OEM certificate.
4.	Battery operated/ Petrol operated (Preference for battery operated)	BOO to check and verify the parameter through OEM certificate.
5.	Long battery life (18- 22 V Li-ion Battery)	BOO to check and verify the parameter through OEM certificate.
6.	Run time- at least 1 hr of continuous use on single charge	BOO to physically check and verify the parameter through OEM certificate.
7.	Fuel tank – at least 2 Ltr.	BOO to physically check and verify the parameter.
8.	Fuel Efficiency (at high power) – not more than 2.5 L/h	BOO to physically check and verify the parameter through OEM certificate.
9.	Engine power- 3-5HP	BOO to check and verify the parameter through OEM certificate.
10.	Displacement -55-65 CC	BOO to check and verify the parameter through OEM certificate.
